

STATE INVESTMENT BOARD

2424 Heritage Court SW - P.O. Box 40916 - Olympia, Washington 98504-0916 (360) 664-8900 - FAX (360) 664-8912

June 30, 2000

To All Stakeholders:

I am pleased to submit the nineteenth annual report of the Washington State Investment Board (WSIB) for fiscal year 2000.

As of June 30, 2000, retirement fund assets were at an all-time high, increasing by \$4.7 billion to \$46.5 billion. The fiscal year investment return of 14.2 percent represents the sixth consecutive year of double-digit investment performance.

Combined with the self-directed defined contribution funds, the state deferred compensation program, industrial insurance (L&I) funds, permanent funds and other trusts, the WSIB manages \$59.0 billion in total as of June 30, 2000.

Contributing to the WSIB's strong performance this fiscal year was the continuing upward movement in global equity markets. The U.S. Equity portfolio returned 10.8 percent, while the non-U.S. equity portfolio posted a very strong return of 23.1 percent in fiscal year 2000. The Fixed Income portfolio earned 4.3 percent during the fiscal year. The Real Estate portfolio was up 11.5 percent while the Private Equity portfolio (including venture capital and buyout funds) had an exceptional year, finishing up 40.2 percent in fiscal year 2000.

During this past fiscal year, the WSIB began managing the \$750 million State Emergency Reserve Fund. During the coming fiscal year, the WSIB will begin investing the new Washington School Employees Retirement System (SERS) Plans 2 and 3, and the Developmental Disabilities Endowment Trust Fund. These additions will bring the total number of separate funds managed by the WSIB to 31 during fiscal year 2001.

Early in fiscal year 2001, WSIB will begin offering in-house managed self-directed investment options for participants in Deferred Compensation, Teachers' Retirement System Plan 3, SERS Plan 3 and Judicial Retirement. These new WSIB-managed options include three Horizon Funds; daily-valued balanced equity and bond funds geared for specific investment horizons and risk/return objectives. The WSIB also will offer participants in these plans a new WSIB-managed Bond Market Fund option.

I am pleased to take this opportunity to again thank the hard-working and dedicated board and its staff, who have worked diligently to create and implement successful investment programs for these many and varied funds under the WSIB's management.

Gary Moore, Chair

Part 2 of the Annual Report, "Financial Statements and Schedules of Investments," is an integral part of this Annual Report. It contains detailed listings of WSIB's investment holdings.

HIGHLIGHTS OF FISCAL YEAR 2000

- Total assets managed by Washington State Investment Board (WSIB) grew to \$59.0 billion by June 30, 2000, an increase of \$6.1 billion from June 30, 1999.
- The Retirement Funds returned 14.2% in fiscal year 2000, the sixth consecutive year of double-digit investment returns. The Retirement Funds' performance for fiscal year 2000 was in the top 10% of public pension plans over \$1 billion in size.
- The Industrial Insurance Funds returned up to 5.7% in fiscal year 2000.
- The Permanent Funds accrued earnings for distribution totaled \$40.3 million in fiscal year 2000.
- Teachers' Retirement System (TRS) Plan 3 (defined contribution) assets grew by \$359 million in fiscal year 2000, from \$1.3 billion to \$1.65 billion, with net investment earnings of over \$157 million.
- State Deferred Compensation Program assets grew by \$277 million in fiscal year 2000, from \$1.3 billion to \$1.6 Billion, with net investment earnings of over \$121 million.
- Beginning in September 2000, the WSIB will serve as trustee and have full authority for the investment of the new School Employees' Retirement System Plan 3.
- Beginning in Fiscal Year 2001, the WSIB will serve as trustee and have full authoraty for investment of the new Developmental Disabilities Endowment Trust Fund.
- The WSIB received its eighth consecutive unqualified state audit (for fiscal year 1999).
- Beginning in September 2000, new WSIB-managed investment options for defined contribution retirement plans and deferred compensation will be introduced. These new daily-valued investment options are:
 - WSIB Short-Horizon Fund
 - WSIB Mid-Horizon Fund
- WSIB Long-Horizon Fund
- Washington State Bond Fund

WASHINGTON STATE INVESTMENT BOARD

The Washington State Investment Board (WSIB) was created by statute in 1981 to "... exercise all the powers and perform all duties prescribed by law with respect to the investment of public trust and retirement funds." The law goes on to state "... the State Investment Board shall have full power to invest, reinvest, manage, contract, or sell or exchange investments acquired."

As of June 30, 2000, the WSIB has management responsibility for 28 funds which are categorized as either retirement funds (defined benefit and defined contribution), deferred compensation funds, industrial insurance funds, permanent funds, or other trust funds. The Board is composed of nine voting members and five non-voting members.

Although governed by an independent board, the WSIB is part of the Executive branch of state government. As a state agency, Board members and staff are required to comply with all statutory requirements and rules established for all agencies, officials, and employees in the performance of their public duties.

In order to efficiently analyze investment issues, specific areas of responsibility have been assigned to Committees of the Board. The Committees consist of selected Board members and act as extensions of the Board. Their functions are to analyze investment issues under their jurisdiction in greater detail than would be possible for the full Board. Recommendations are brought to the Board at regular meeting dates for a full Board vote.

Investment Principle

"The Board shall establish investment policies and procedures designed exclusively to maximize return at a prudent level of risk." (RCW 43.33A.110)

"The Board shall consider investments not in isolation, but in the context of the investment of the particular fund as a whole and as part of an overall investment strategy, which should incorporate risk and return objectives reasonably suited for that fund." (RCW 43.33A.140)

"The Board shall diversify the investments of the particular fund unless, because of special circumstances, the Board reasonably determines that the purposes of that fund are better served without diversifying." (RCW 43.33A.140)

Mission Statement

To invest and to manage the entrusted funds in a manner consistent with statutes, regulations, Board policies and the highest standard of professional conduct for the exclusive benefit of fund beneficiaries.

WASHINGTON STATE INVESTMENT BOARD

BOARD-ESTABLISHED COMMITTEES

The Board has established four Committees which are appointed by the Chair and approved by the Board as follows:

Administrative

This Committee is responsible for organizational, personnel, budget, and legislative issues, as well as strategic asset allocation matters.

Audit

This Committee oversees audit activities and nominates candidates for the nonvoting positions on the Board. In addition, the Audit Committee develops and monitors the Code of Conduct for the Board, reviews performance reporting requirements, and deals with corporate governance policies and issues.

Private Markets

This Committee is responsible for development of policy and structure for private market investments (real estate, venture capital, leveraged buyouts, etc.). The Private Markets Committee also reviews individual real estate transactions, partnerships, and private equity investments for recommendations to the Board.

Public Markets

This Committee deals with investments in the public markets, including both debt and equity.

OUTSIDE HELP AND ADVICE

Even with a highly skilled, professional staff, the Board must rely on a variety of outside experts to provide advice and counsel, as well as specific investment services. The following list includes the consultants and advisors currently utilized by the Board.

Money management firms hired by the Board to manage specific portions of the equity portfolio, and other assets managed by general partners in private equity and real estate, are listed on the pages describing those specific investment programs.

RATIO OF TOTAL COSTS TO ASSETS MANAGED

STATE INVESTMENT BOARD BUDGET

The WSIB is referred to as a "non-general fund" agency for budgetary purposes. The WSIB receives no state tax monies; its funding comes from earnings on the assets managed. Portions of earnings are spent on appropriated and non-appropriated expenses.

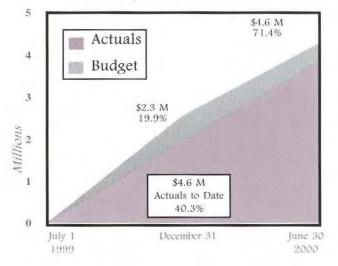

THE BIENNIAL BUDGET (Appropriated Expenses)

The WSIB follows the same budget process as any other state agency. The Board receives a biennial (two-year) appropriation from the legislature, which covers normal department operations, including staff, facilities, equipment, supplies, etc.

The biennial budget is approved by the state legislature every odd-numbered year. The biennial budget funds the WSIB from July 1 of the odd-numbered year, following passage of the state budget, to June 30 of the next odd-numbered year.

Like any other state agency, the WSIB cannot operate in a deficit. The appropriated operating expenses are funded based on a formula established by statute whereby each fund invested by the WSIB pays a share proportional to the value of the assets of the fund. The WSIB's operating budget is tiny in comparison to the assets managed. Currently, the two-year operating budget is 0.019 percent of the total assets managed (\$59.0 Billion). For fiscal year 2000, the appropriated operating expenditures were \$4,626,544 or .008 percent of the total assets managed.

Appropriated Expenditures as of June 30, 2000

<u>INVESTMENT EXPENSES</u> (Non-Appropriated)

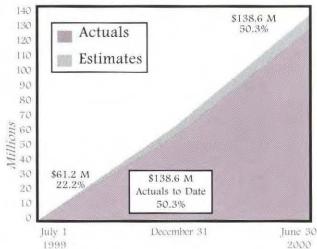

Fees and expenses associated with the management of investments typically include money manager, custodial bank, consultant, and legal fees specifically related to an investment or group of investments. These expenses are classified as non-appropriated expenditures which do not require specific legislative appropriation.

Statutory authority for these expenditures is codified in RCW 43.84.160, Investment counseling fees payable from earnings: "Investment counseling fees established by contract shall be payable from the investment earnings derived from those assets being managed by investment counsel."

For fiscal year 2000, total non-appropriated expenditures were \$138,572,838 or .235 percent of the total assets managed.

Investment expenses in fiscal year 2000 grew due to increased private equity and real estate commitments, and the capturing of netted investment management fees.

Non-Appropriated Expenditures as of June 30, 2000

INVESTING IN WASHINGTON

While the WSIB continually seeks the best investment opportunities no matter where they might be located, the state of Washington is home to many tremendous companies that offer the WSIB excellent investment opportunities. Many Washington investments can be found in all of the WSIB's investment portfolios.

In the public markets (public equity and fixed income), the WSIB portfolio contains share ownership in and/or holds debt instruments issued by over 100 publicly-held companies headquartered in the state of Washington. Among the many Washington companies represented in the WSIB portfolio are:

- Advanced Radio Telecom
- Airborne Freight Corp.
- Applied Microsystems Corp.
- Amazon.Com
- Boeing
- Cell Theraputics
- Cutter & Buck
- First Washington Bancorp
- > Immunex
- > Interwest Bancorp
- Longview Fibre
- Microsoft
- Microvision
- Nextel Partners, Inc.
- Nordstrom
- Paccar
- Pathogenesis Corp.
- > Photoworks, Inc.
- Potlatch
- Puget Sound Energy
- Real Networks, Inc.
- Safeco
- Sonosite, Inc.
- Spacelabs Medical
- > Starbucks
- Todd Shipyards, Corp.
- > Trendwest Resorts
- VoiceStream Wireless
- Washington Mutual
- Weyerhauser

Several of the WSIB's real estate partners and managers have acquired or managed assets located in Washington. The following are some examples:

- > 1551 Eastlake Avenue Seattle
- > Bellevue Galleria Bellevue
- Columbia Technology Center Vancouver
- > Lenora Square Seattle
- > One & Two Union Square Seattle
- Pacific Business Park North ~ Kent
- Southcenter Corporate Square Seattle

The most direct impact the WSIB investments might have on the Washington economy is in private equity ownership. Some of the private equity portfolio companies headquartered in Washington include:

- Apex Learning, Inc.
- > Asterion.com
- Avenue A Media
- Bsquare Corp.
- > Captura Software
- > Car Toys
- Corixa Corp.
- > Cybersafe Corp.
- Data Channel Corp.
- > ESC Medical Systems
- > F5 Networks
- GST Network Funding
- > iCopyright.com
- > Imandi.com
- InterNAP Network

RETIREMENT PLANS

The Department of Retirement Systems (DRS) is the administrative arm of the State's multiple-employer retirement systems. Headed by a cabinet-level director, who also serves as a voting member of the WSIB, DRS administers the pension plans for state employees, teachers and classified educational employees; law enforcement officers and fire fighters; and other employees of participating political subdivisions.

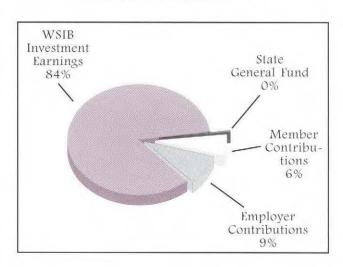

The retirement system membership has grown to 393,286 members as of June 30, 2000, including 21,589 inactive members.

Trust fund revenues totaled \$6,652 million for fiscal year 2000 (including TRS Plan 3 Self-Directed). This included \$420 million in member contributions and restorations, \$593 million in employer contributions, \$25 million in General Fund contributions, and \$5,614 million in investment earnings.

ASSET GROWTH

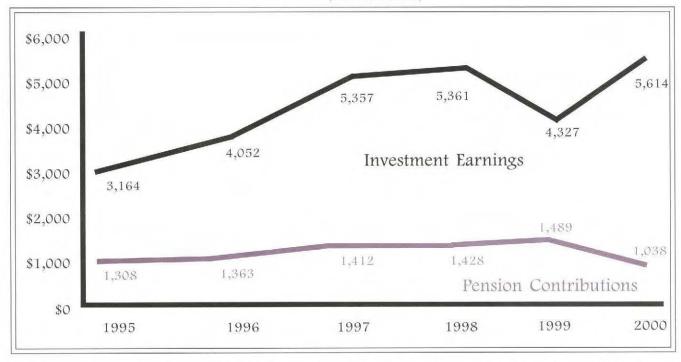

Over the past ten years, the assets of the Retirement Funds have grown from \$13.5 billion to \$46.5 billion (as of June 30, 2000), not including TRS Plan 3 Self-Directed. This growth has three components: employer contribution, employee contribution, and investment return.

Employer contributions are driven by the obligation of the employer to fund the plan in a systematic and deliberate manner consistent with actuarial projections, existing statutes and availability of funds.

The employee contributions are the most predictable of the three components since many are statutory and less likely to change.

Investment returns are primarily the result of capital market returns and asset allocation. The WSIB has no control over capital market returns; it does, however, have control over the Retirement Fund's asset allocation, investment strategies, risk-return objectives, and certain investment decisions. The asset allocation policy is regularly reviewed and revised when appropriate. (See the Asset Allocation section on page 22).

Retirement Trust Fund Revenues (in Millions)

Note: Investment earnings and pension contributions include Teachers' Retirement System Plan 3 Self-Directed investment. Source of pension contributions: Department of Retirement Systems. Source of investment earnings: Washington State Investment Board and Department of Retirement Systems (for TRS Plan 3 Self-Directed investment earnings).

RETIREMENT FUND PERFORMANCE

The WSIB measures its performance by the achievement of expected returns on the assets under management, and comparisons to appropriate benchmarks.

An important part of the asset allocation policy process is to set an expectation for performance of the individual asset classes, as well as the Retirement Fund as a whole. Although returns will vary quarterly and annually, the long-term expectation should exceed the actuarially assumed rate over time.

Assets differ in their behavior and volatility. For example, since public market investments can be priced instantaneously, fair market value can be determined with certainty. However, the real estate and private equity investments are very illiquid, are not easily priced, and may take years before offering the expected return to the investor. These characteristics must be kept in mind when reviewing quarterly and annual returns.

The eight largest defined benefit retirement funds are invested through the Retirement Commingled Trust Fund (CTF). The CTF serves to pool the assets of the eight separate funds in order to provide for more efficient management and reduce administrative costs and investment fees.

## INVESTMENT GROWTH AND RETURNS

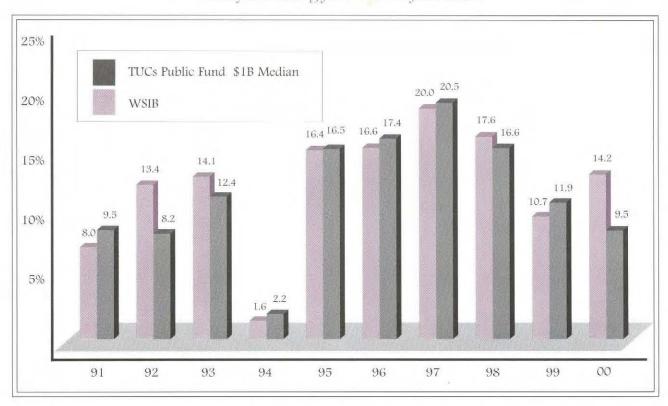

#### RETIREMENT FUND HISTORICAL MARKET VALUES

Fiscal years ending June 1991 to June 2000

RETIREMENT FUND HISTORICAL RATES OF RETURN

Fiscal years ending June 1991 to June 2000

## ASSET ALLOCATION

Asset allocation is the driver of investment performance. Research consistently shows that a plan's asset allocation explains over 90 percent of the variation in investment return. Accordingly, the WSIB spends considerable time and effort developing, monitoring, and adjusting the asset allocation of the retirement fund portfolio. To control the risk of the asset mix, the Board has established tight policy ranges around each asset class. By placing the fund's assets in several investment areas, the Board reduces the overall investment risk. The retirement fund is spread across five basic asset types. The following pages outline how each asset type is further diversified in line with the Board's mandate of a maximum rate of return at a prudent level of risk.

The Board has established a long-term plan based upon the average investment returns of the past half-century. The Board formally reviews the plan every three to four years. The last study was performed in late 1996. At that time, the Board shifted ten percent of the assets in fixed income over to U.S. equity, private equity, and real estate. Further, the Board adopted a five-year implementation plan. At fiscal year-end, the WSIB is more than halfway through that time line. As a result of the historic climb of the U.S. equity market, the growth of the private investment portfolio has been partially hidden by the continued growth of the U.S. equity portfolio.

The actual asset mix is monitored monthly by the Board. The investment staff has directed several shifts during the fiscal year to move toward the long range targets. This resulted in the fund taking profits at key times in the U.S. equity market and the Non-U.S. equity market. Staff expects to achieve the long term targets within the desired goal by year-end 2001. Both real estate and private equity have open contractual commitments to top tier investment partners that will place them very close to their long-term targets over the next two years. At June 30, 2000, private equity has open commitments of \$4.3 billion and real estate has open commitments of \$839 million. It is expected that these commitments will be called over the next three to four years. The capital to fund these commitments will come from U.S. and non-U.S. equity and the fixed income portfolio.

## U.S. EQUITY PROGRAM

## THE PROGRAM

The U.S. Equity Portfolio is structured to capture the returns of the broad U.S. equity market. The WSIB uses a passively-managed U.S. Equity Market Index Fund to provide broad market exposure similar to the Wilshire 5000 index. This index measures the performance of all U.S. headquartered equity securities with readily available price data. Over 7,000 capitalization-weighted security returns are used to calculate the index.

As of June 30, 2000, the defined benefit retirement funds had \$17.9 billion invested in the U.S. Equity Market Index portfolio. Approximately 76 percent of the portfolio consisted of large-capitalization, S&P 500 companies. The remaining 24 percent of the index was comprised of mid-capitalization and small-capitalization companies. Accordingly, the large-cap component of the WSIB U.S. equity portfolio totaled \$13.6 billion, while the small/mid cap component represented \$4.3 billion.

## FISCAL YEAR HIGHLIGHTS

Even with a significant downturn in the second quarter of 2000, the U.S. equity markets were strong once again over the fiscal year. Small-cap stocks outperformed large-cap stocks during the year, as the Wilshire 4500 Index returned 22.1 percent, while large stocks, as measured by the S&P 500 Index, returned 7.2 percent. The return of the U.S. equity portfolio was 10.8 percent for the year, which exceeded the 9.5 percent return of Wilshire 5000 Index.

Citigroup Incorporated	1.23
Nortel Networks Corporation	1.22

## NON~U.S. EQUITY PROGRAM

#### THE PROGRAM

As of June 30, 2000, the Non-U.S. Equity Program totaled \$8.0 billion and represented 17.2 percent of the total retirement fund.

The Non-U.S. program is designed to represent both developed and emerging markets except the United States, weighted by market value. The benchmark is the Morgan Stanley Capital International (MCSI) All Country World (ACWI), excluding the U.S.

For the developed markets, the program has a 50 percent active/50 percent passive mix. The program now has a structure that integrates all the developed international markets, using firms that manage money in Europe, Australia, and the Far East (EAFE), as well as Canada. These firms are allowed to invest up to ten percent of the assets in emerging markets as well. The active management portion of the developed markets program consists of six active international equity firms which were hired in 1999: Artisan Partners, Delaware International Advisers, Dresdner RCM Global Advisers, Nicholas Applegate, Putnam Investments and Pyrford International. For the fifty percent of the developed markets program that is indexed, State Street Global Advisors passively manages to MSCI EAFE + Canada. The majority of the asset transition to the new structure began in mid-June 1999 and was completed in mid-July.

The Emerging Markets component makes up 9 percent of the Non-U.S. Equity Program totaling about \$721 million as of June 30, 2000. Seventy-six percent of the Emerging Markets component is actively managed by four firms: Genesis Asset Managers, Schroder Capital Management, Foreign & Colonial, and Grantam, Mayo, Van Otterloo & Co. In addition, State Street Global Advisors manages an emerging markets liquidity tier index fund.

#### FISCAL YEAR HIGHLIGHTS

The WSIB Non-U.S. equity portfolio returns for fiscal year 2000 were a very strong 23.1 percent, outperforming the MSCI ACWI ex. U.S. index return of 18.1 percent. While the emerging markets cooled slightly in fiscal year 2000, the WSIB's emerging markets composite earned a very respectable 11.1 percent return, slightly ahead of the IFC Investable Index (10.7 percent). A rebound in Europe propelled the developed markets, as measured by the MSCI EAFE plus Canada, to a strong 18.8 percent return. The WSIB's developed market component outperformed this index, returning 24.5 percent for fiscal year 2000.

## FIXED INCOME PROGRAM

## THE PROGRAM

Fixed income securities constitute an important component of the portfolios of most institutional investors. Several factors make these instruments attractive in a pension portfolio. Fixed income securities offer diversification from a pure equity portfolio. Less risky than equities, fixed income securities help control the overall portfolio volatility.

The WSIB domestic fixed income program is internally managed with the Lehman Aggregate Index as the performance benchmark. The WSIB may invest in the following fixed income instruments:

- ➤ U.S. treasuries (TSY) and government agencies (Agency)
- ➤ Investment-grade and split-rated corporate bonds (Corporates or Credit)
- Publicly traded mortgage backed securities (MTG)
- Commercial Mortgage-Backed Securities (CMBS)
- Privately-placed mortgages
- Private placements of corporate debt
- > Convertible securities
- ➤ Non-dollar bonds
- > Asset-backed securities (ABS)
- ➤ Real estate mortgages
- > Treasury Inflation Protection Securities (TIPS)

The state of the s

The fixed income management strategy is primarily one of sector selection. The portfolio is structured to be overweighted or underweighted relative to the index's major sectors: Treasuries, Agencies, Corporates, Mortgage-Backed Securities and Asset-Backed Securities. As of June 30, 2000, the portfolio was underweighted relative to the index in Governments and Mortgages, and overweighted in Corporates, Asset-Backed Securities and CMBS.

Not only is the total mortgage allocation lower than that of the index, about three-fourths of the mortgages are comprised of Collateralized Mortgage Obligations (CMOs), whose structure provides more stable cash flows than standard pass-through mortgages.

Individual sector structures may also be overweighted or underweighted relative to that of the index. For example, the corporate portfolio's allocation to industry and credit rating differ from the index, as do the mortgage portfolio's allocation to coupon and maturity.

Treasury and Agency debt have the highest credit rating since they are backed by either the U.S. Treasury or governmental agencies. Most mortgage debt has agency equivalent ratings, but some structured product held may be Aaa or Aa. Investment grade Corporate debt ranges from Aaa (the highest) to Baa (the lowest). More than forty percent of all investment-grade corporate debt issued is A rated. The portfolio's overall credit allocation reflects its large allocation to Corporates, its Corporate concentration in Baa-rated companies, and the mortgage allocation to Agency and Aaa-rated structured mortgage product.

For most of the last year the duration of the portfolio was less than 10 percent longer than that of the index, and both started and ended the year at about 4 percent longer.

## FIXED INCOME PROGRAM

## FISCAL YEAR HIGHLIGHTS

The economy was strong during fiscal 2000, with continued low unemployment and low inflation. For the fiscal year, the one-year, ten-year, and thirty-year treasuries returned 5.1 percent, 3.1 percent, and 4.4 percent, respectively. The yield on the thirty-year treasury bond started the fiscal year at 6.0 percent and ended at 5.9 percent, a difference of only 9 basis points. During the year, however, it was somewhat volatile, rising to a high of 6.7 percent in January, 2000, and dropping to a low of 5.7 percent in April, 2000.

The WSIB's fixed income portfolio returned 4.3 percent for the fiscal year, lower than the Lehman Aggregate Index return of 4.6 percent. Corporates (Credit), which have the largest allocation within the portfolio, performed poorly for the second consecutive year. The portfolio's allocation to asset backed securities and cash performed the best for the year, both being very short duration assets. These were followed by mortgage-backed securities, treasuries and agencies, and lastly, corporates. Throughout the year, the portfolio's duration averaged almost 5.5 percent longer than that of the index, with a low of 0.1 percent in May, 2000 and a high of just over 10 percent longer in July, 1999.

## PRIVATE EQUITY PROGRAM

#### THE PROGRAM

Private equity investments range from leveraged buyouts of corporations to the investment of initial capital in start up enterprises. These investments are very long term in nature (up to 12 years) and are highly illiquid. They are attractive to sophisticated institutional investors, because over long time horizons private equity investment can offer higher returns than traditional public equity investments.

The objective of the WSIB's private equity portfolio is to achieve, over a long term, annualized, risk adjusted returns of 400 basis points (or four percent) above the U.S. stock market. The WSIB's asset allocation target for private equity is 15 percent of the total retirement fund. Over the past fiscal year, the Board committed more than \$2 billion to Private Equity partnerships. The portfolio increased in value from \$3.46 billion to \$5.53 billion during the past fiscal year, 11.9% of the total retirement fund. At the current pace, the WSIB plans to meet the long-term target by year end 2001.

The portfolio is well-diversified across many subclasses of private equity including venture capital, (early stage, expansion, or late stage), distressed companies, buyouts of established companies (medium and large companies) and several other strategies.

Due to the long-term and private nature of these investments, the valuations of these investments are based on conservative estimates. The true return on investment can only be accurately measured upon liquidation of the investment. Many investments are carried at original cost for considerable periods, until some event allows for the estimation of a market value. Such events would include an initial public offering, a subsequent round of financing or a commitment to purchase the investment. The valuations contained in this report are made by the General Partners, and reviewed by the WSIB consultants in accordance with currently accepted accounting practices.

Since the inception of the program in 1981, the fund has achieved an annual 17.4 percent internal rate of return (IRR), which is net of partnership fees and expenses. The internal rate of return calculation is the industry standard method of investment performance. Time weighted returns, which represent performance independent of the timing of cash flows, are also calculated for the asset class; for fiscal year 2000 the portfolio earned a 40.2 percent return.

TOTAL	\$ 5,53	3,824	

## REAL ESTATE PROGRAM

## THE PROGRAM

The WSIB's real estate program is an externally managed pool of select partnership investments, intended to provide alternative portfolio characteristics when compared to traditional stock and bond investments. The majority of the WSIB's partnerships invest in institutional-quality real estate assets that are leased to third parties. The combination of income generated from bond-like lease payments, coupled with the hard asset qualities of commercial real estate, combine to generate returns that are expected to fall between the return expectations for fixed income and equities. The real estate portfolio is managed to deliver risk-adjusted returns that are consistent with the Board's long term return expectations for the asset class. The WSIB's real estate partnerships typically invest in private real estate assets that are held for long term income and appreciation. Many of the WSIB's investment partnerships do not involve co-investment with other financial entities, thereby providing the WSIB with control provisions related to liquidation, acquisition, and ongoing operational decisions like annual capital expenditures.

Volatility within the real estate portfolio is minimized through a combination of factors. First, the majority of the WSIB's partners own commercial real estate assets in a private investment form. Private investments are not subject to public market volatility and are generally held at cost or priced using appraisal-based pricing methodology. Second, real estate capital is diversified among a host of partners with varying investment styles. Third, partnership assets are invested in numerous economic regions, including international markets, and in various property types. Fourth, WSIB partners invest at different points within the asset's capital structure.

Each year the WSIB reviews market conditions and makes adjustments to its investment strategy. This strategy establishes funding and return objectives for the real estate program for the ensuing three-year planning period. The current plan forecasts that about one billion dollars in additional WSIB commitments will be required during the next three-year period to meet the Board's allocation objectives. The plan also establishes long term return expectations for the program. The current plan calls for a target benchmark of one to three percent above the NCREIF index.

## FISCAL YEAR HIGHLIGHTS

During fiscal year 2000, real estate markets continued their recovery. For the one-year period ending June 30, 2000, the NCREIF Index posted a total net return of 11.1 percent. The WSIB's real estate portfolio returned 11.5 percent for the same time period. Over five years, the WSIB's real estate portfolio has significantly outperformed the NCREIF Index, 18.7 percent to 11.9 percent.

## REAL ESTATE PROGRAM

During the fiscal year ending June 30, 2000, the WSIB made an equity commitment of \$100 million to Olympia Properties partnership. The WSIB's commitment to Olympia properties may take years to be drawn and will not be drawn unless acceptable investment opportunities are found by the partnership.

- > Accident Fund
- Medical Aid Fund
- > Pension Reserve Fund
- > Supplemental Pension Fund

The WSIB manages Industrial Insurance funds on behalf of the Department of Labor and Industries (L & I). The Industrial Insurance Portfolio consists of four separate funds that total \$8.5 billion.

#### ACCIDENT FUND

This fund earns revenue from employer premiums for industrial insurance and investment interest. The primary use is to pay disability benefits for injured workers, such as time loss compensation, permanent partial disability, certain travel and retraining expenses, burial awards, and administrative costs.

#### MEDICAL AID FUND

The Medical Aid Fund earns income from premiums paid by both the employer and employee, as well as investment earnings. Payments are made for conservative medical care, hospital services, artificial appliances, physical and vocational rehabilitation, travel expenses, any other service required by the injured worker, and administrative costs.

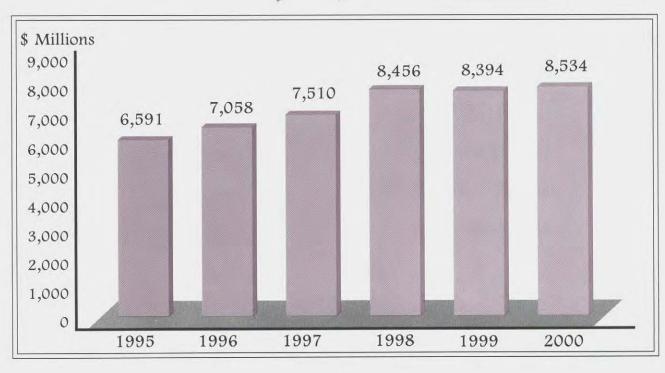

#### PENSION RESERVE FUND

This fund is maintained by transfers of money from the Accident Fund at the time that a new pensioner is setup. This pays the permanently disabled worker and survivors of deceased injured workers.

#### SUPPLEMENTAL PENSION FUND

The Supplemental Pension Fund receives income from employer and employee premiums and investment earnings. These funds are used to supplement time loss and pensions based on older, lower schedules and to compensate for cost of living increases.

# HISTORICAL MARKET VALUES June 30, 2000

#### ASSET ALLOCATION

June 30, 2000

The Industrial Insurance Fund portfolios are weighted strongly toward corporate bonds (credit) with a meaningful allocation to equities. Corporates allow the funds to hold assets with higher yields than government bonds as a result of their credit risk. Most of this weighting lies in A and Baa rated companies. The equity allocation provides diversification from fixed income assets, with equities providing both higher return and greater volatility. This allocation also acts as an inflation hedge for the Medical Aid Fund, which has the largest equity holding of the four funds. At the end of the fiscal year, the equity allocation was 16.4 percent.

- > Common School Permanent Fund
- > Normal School Permanent Fund
- > Scientific School Permanent Fund
- > State University Permanent Fund
- > Millersylvania Park Trust Fund
- > Guaranteed Education Tuition Fund
- > State Emergency Reserve Fund
- > Game and Special Wildlife Fund
- > State Employees Insurance Reserve
- > Radiation Perpetual Fund
- > Reclamation Revolving Fund

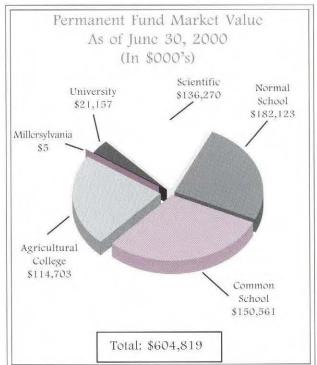

#### PERMANENT FUNDS

The WSIB manages assets for six Permanent Funds each with its own specific purpose and investment constraints. In aggregate, the assets of the Permanent Funds totals \$605 million. Permanent Funds are non-expendable trust funds in which the investment principal (corpus) remains intact as required by the Washington State Constitution.

The Permanent Funds are invested in fixed income and short-term holdings with the exception of the Common School Permanent Fund, which is also invested in the U.S. Equity Market Index Fund.

The five education Permanent Funds were established through land grants from the federal government to benefit the Washington State schools and colleges. Investment earnings are distributed to the schools, colleges and universities in the state for the purpose of bond repayment, capital development, and facilities maintenance.

The Millersylvania Park Trust fund was established from a gift of cash and securities. The earnings on investments are used for improvement, maintenance, and upkeep of the Millersylvania State Park.

Performance as of	1	Year	3	Years	5 Years
June 30, 2000	Total	Distribution	Total	Distribution	Total
	Return	Return	Return	Return	Return
Agricultural College Fund	4.0%	7.0%	5.7%	6.8%	6.2%

Normal School Fund	4.1%	6.8%	5.8%	6.7%	6.2%
Scientific University Fund	3.7%	6.5%	5.6%	6.5%	6.1%
State University Fund	4.1%	7.1%	5.8%	7.1%	6.2%
Lehman Aggregate Index	4.6%		6.0%		6.6%
Millersylvania Park Fund	5.8%	5.8%	5.5%	5.5%	5.5%
90 Day T-Bill	5.1%		5.2%		5.3%

Distribution returns include coupon interest, expenses and fees, realized gains and losses, and additional income. Total return also includes unrealized market gains and losses on the investments held based on values captured at a point in time (June 30, 2000).

Fiscal Year 2000 Distributions: Agricultural College Fund, \$8,008,818; Common School Fund, \$10,009,368; Normal School fund, \$12,106,162; Scientific University Fund, \$8,749,188; State University Fund, \$1,477,190; Millersylvania Park Fund, \$290.

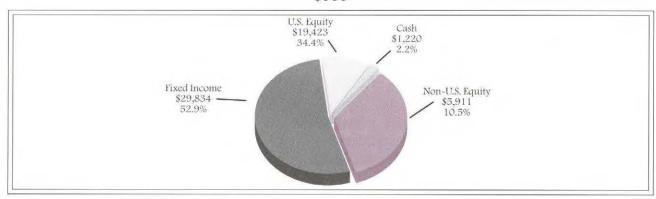

### OTHER TRUST FUNDS

The WSIB manages assets for five other trust funds that total about \$850 million in aggregate. Each fund has its own specific purpose and investment constraints.

#### > Guaranteed Education Tuition Fund (\$56.4 million)

The GET Program allows individuals or groups to purchase state college and university tuition units for future use at current prices. Program administration is under the authority of the Committee on Advanced Tuition Payment. The WSIB serves as trustee for and invests the funds from advance tuition purchases in a mix of fixed income, U.S. equity, non-U.S. equity and short-term holdings.

GET Fund Asset Allocation June 30, 2000 \$000

Performance	1 Year	Since Inception (Sept. 1998
GET Fund	10.3%	8.4%
CPI (Inflation) +4.5%	8.2%	7.4%

#### > State Emergency Reserve Fund (\$749.2 million)

The State Emergency Reserve Fund was created under the guidelines of State Proposition 601 to provide the State of Washington with a budget reserve fund. The monies in the fund are managed by the Office of Financial Management and overseen by the budget committees of the state House of Representatives and Senate. WSIB began investing the State Emergency Reserve Fund in July, 1999. The fund is invested in fixed income and short-term holdings.

Performance	1 Year
Emergency Reserve Fund	5.1%
90 Day T-Bill	5.1%

### OTHER TRUST FUNDS

#### Game and Special Wildlife Fund (\$10.7 million)

This fund was created to hold moneys received as compensation for wildlife losses. The WSIB is authorized to invest surpluses in the Special Wildlife Fund. The program is under the authority of the State Fish and Wildlife Commission. The fund is invested in short-term holdings.

#### State Employees Insurance Reserve (\$32.2 million)

This fund was created for the purpose of holding and investing reserves needed for the payment of claims in insurance programs under the Health Care Authority. The account is funded from the reserves of the public employees' and retirees' insurance account. The fund is invested in short-term holdings.

#### Radiation Perpetual Fund (\$829 thousand)

This fund was created to provide moneys for the maintenance, surveillance, and other care of radioactive materials at sites no longer operating. Funding is from a charge imposed on each pound of uranium or thorium compound milled out of raw ore. The program is under the authority of the Department of Health. This fund is invested in short-term holdings.

#### Reclamation Revolving Fund (\$947 thousand)

This fund was created to provide a source of funding for the reclamation and development of lands suitable, and economically available, for development as agricultural lands. This fund is invested in short term holdings and municipal water district bonds.

Performance as of June 30, 2000	1 Year	3 Year	<u>5 Year</u>
Game and Special Wildlife Fund	5.8%	5.7%	5.8%
State Employees Ins. Reserve	5.8%	5.5%	5.5%
Radiation Perpetual Fund	5.8%	5.5%	5.5%
Reclamation Revolving Fund	4.8%	5.6%	6.0%
90 Day T-Bill	5.1%	5.2%	5.3%

#### **GLOSSARY**

Acquisitions/Buyouts. The acquisition of a company or division usually involving leverage or some financial restructuring of the balance sheet.

Active Management. A style of investment management with the objective of attaining excess risk-adjusted performance versus the benchmark as a result of structuring a portfolio differently from the benchmark.

Asset. Anything owned that has value and is measurable in terms of money.

Asset Class. Categories of investments that share certain characteristics and exhibit similar patterns of return.

Benchmark. The performance objective represented by a model portfolio used to define the return against which another portfolio is to be evaluated.

Beneficiary. The recipient of fund benefits.

Commingled Fund. An investment fund in which the manager pools the assets of several trust accounts to permit more efficient management and to reduce administrative costs.

Defined Benefit Plan. A pension plan that promises to pay a specified amount to each person who retires, generally based upon a formula combination of years of service, age at retirement, and final compensation.

Defined Contribution Plan. A pension plan in which the retirement benefit is based solely on the amount contributed to an individual account plus net investment earnings. Members receive a full market rate of return; however, there is no guaranteed rate of return and the value of the member's account will increase or decrease based on fluctuations in the market.

Distressed Entities. The investment of equity or debt capital into an entity with various degrees of management assistance to help fix the underlying problems of the company.

*Diversification.* A technique of reducing risk by spreading investments among different asset classes, industries and sectors.

Efficient Market. The hypothesis that prices of securities fully reflect all available information.

Ex-officio Member. A member by virtue of office or position.

Fiduciary. One who holds something or acts in trust for another.

Fixed Income. Securities representing debt obligations and having fixed payments and maturities, as opposed to, for example, stock, which has no set dividend payment and/or maturity. Different types of fixed income securities include money market instruments, government and corporate bonds, mortgage-backed securities (including collateralized mortgage-obligations), asset backed securities, preferred stock, and convertible issues.

*Index.* A group of securities that represents the universe of available investments in a specific class or subclass of assets.

Leveraged Buyout. The purchase of assets or stock in a company using borrowed funds, with the expectation that operation of the company will enable repayment of these funds.

Liquidity. Describe the ease with which assets can be turned into cash. Liquidity is also used to describe an asset class made up of cash equivalents and other short-term investment vehicles.

#### **GLOSSARY**

Nonvoting Members. Members, typically experts in the investment and economics fields, who are appointed by the board and act in an advisory capacity.

Passive Management. An investment strategy which seeks to attain specific benchmark performance at a low cost.

Private Debt. The infusion of debt capital into a company or entity with some type of equity participation.

*Private Equity.* The infusion of equity capital into a company conferring either a controlling interest or significant influence in the company's management.

Risk (investment). The degree of uncertainty and/or the amount of possible loss that characterizes some course of action. The greater the volatility of the investment, the greater the degree of uncertainty of future investment returns.

Self-Directed Investment. An investment program in which the individual members or participants choose the investment vehicles for his/her assets, usually from among a set of investment options provided by the trustee. Members or participants receive a full market rate of return.

Stock. Ownership of a corporation represented by shares that are claim on the corporation's earnings and assets.

Style Risk. Individual managers generally can be categorized as investing in certain segments of the market (e.g., market capitalization size or low/high price earning companies). Style risk

is the degree of uncertainty and/or the amount of possible loss resulting from a style of management that differs from expectations. Style risk can occur either at the manager level, asset class level, or the consolidated portfolio level.

Trustee. A person, agency, bank, or trust company that has responsibility over financial aspects (receipts, disbursements, and/or investment) of funds. One who acts in the capacity of trust as a fiduciary and to whom property has been conveyed for the benefit of another party.

TUCS Public Fund Median. Trust Universe Comparison Services Median return of other public funds.

TUCS Total Funds Median. Trust Universe Comparison Services Median return of corporate and public funds.

Venture Capital. Equity financing of early, expansion, and later stage emerging, small businesses. Companies grow from start-up to medium size businesses, and are then either sold to the public through an Initial Public Offering, or are sold to a trade or financial buyer.

Volatility. In financial matters, volatility of returns is the measurement used to define risk. It describes the spread of annual returns from lowest to highest over a particular period. The greater the volatility, the higher the risk.

Voting Members. The nine voting members of the board. They include four members which represent various stakeholders in the pension systems, three ex-officio members, and one legislator from each house.

The Washington State Investment Board is an equal opportunity and affirmative action employer. Every effort will be made to provide reasonable accommodation and accessibility to WSIB employees and the public we serve.

Special thanks to the following people for their work in producing WSIB's 2000 Annual Report:

#### NOTE:

The information in this section includes the Teachers' Retirement System (TRS) Plan 3 Total Allocation Portfolio (TAP), but does not include TRS Plan 3 self-directed investment. See Note 5 under Retirement Funds Notes to Financial Statements.

# Washington State Investment Board Retirement Funds

Notes to Financial Statements June 30, 2000

#### Note 1: Significant Accounting Policies

Retirement fund investments are reported at fair market value, with the exception of short-term investments, which are reported at cost, and commercial real estate mortgages, which are reported at unpaid principal, adjusted for estimated uncollectibles.

Interest and dividend income is accrued when earned. Capital gains and losses are recognized on a trade date basis. Purchases and sales of investments are also recorded on a trade date basis.

Monthly, the assets of the retirement Commingled Trust Fund (CTF) are adjusted to fair market value. Unrealized gains and losses are included as investment earnings on the Statement of Changes in Investment Balance.

The Washington State Investment Board (WSIB) reports collateral received under securities lending agreements where the state has the ability to spend, pledge, or sell the collateral without borrower default. Liabilities resulting from these transactions are also reported. Additionally, costs associated with securities lending transactions, and broker commissions paid, are reported in the accompanying statements. The Schedule of Investments and Statement of Investments do not include detailed holdings of securities lending collateral by investment classification.

#### Note 2: The Commingled Trust Fund

The CTF is a diversified pool of investments which is used as an investment vehicle for eight separate retirement plans. These plans hold "units" in CTF, which represent a percentage ownership in the pool of investments. Plans are allowed to purchase or sell units in the CTF, based on the market value of the underlying assets, on the first business day of each month.

In addition to unit ownership in the CTF, each retirement plan holds its own short-term investments. These short-term investments are referred to as "plan-specific investments" in the accompanying financial statements and are used to manage the cash needs of the retirement plans.

The Commingled Trust Fund consists of the Public Employees' Retirement System (PERS) Plans 1 and 2; the Teachers' Retirement System (TRS) Plans 1 and 2/3; the Law Enforcement Officer and Firefighters Plans 1 and 2; the Washington State Patrol Retirement System; and, the Volunteer Firefighters Retirement Plan.

#### Note 3: Fees and Expenses

Investment related fees and expenses are paid from non-appropriated funds. The Schedule of Investment Expenses is a listing of non-appropriated fees and expenses paid during the fiscal year ending June 30, 2000.

#### Note 4: Unfunded Commitments

The WSIB has entered into a number of agreements that commit the state, upon request, to make additional investment purchases up to a stated amount. As of June 30, 2000, the state had the following unfunded investment commitments:

Private Equity	\$ 4,339,371,271
Real Estate	\$ 305,117,544

#### Note 5: Teachers' Retirement System Plan 3

The financial information presented in this section includes the WSIB Total Allocation Portfolio (TAP) for TRS Plan 3, which is invested in the Commingled Trust Fund. It does not include TRS Plan 3 self-directed investments, which is accounted for and reported on by the Department of Retirement Systems (DRS).

#### Note 6: Derivatives

At June 30, 2000, no derivative securities were held directly by the WSIB; however, derivatives may include up to a portion of the WSIB's individual investment managers portfolios.

# Washington State Investment Board Industrial Insurance Funds

Notes to Financial Statements June 30, 2000

### Note 1: Significant Accounting Policies

Industrial Iinsurance (Labor & Industries) funds are enterprise funds for financial reporting purposes. Enterprise funds use the full accrual basis of accounting where revenues are recorded in the period earned and expenditures in the period incurred.

Investments are reported at fair market value, with the exception of short-term investments, which are reported at cost.

Interest and dividend income is accrued when earned. Capital gains and losses are recognized on a trade date basis. Purchases and sales of investments are also recorded on a trade date basis.

Unrealized gains and losses are included as investment earnings on the Statement of Changes in Investment Balance.

The WSIB reports collateral received under securities lending agreements where the state has the ability to spend, pledge or sell the collateral without borrower default. Liabilities resulting from these transactions are also reported. Additionally, costs associated with securities lending transactions, including broker commissions paid, are reported as investment management expenses in the accompanying statements. The Schedule of Investments and Statement of Investments do not include detailed holdings of securities lending collateral by investment classification.

### Washington State Investment Board Permanent Funds

Notes to Financial Statements June 30, 2000

### Note 1: Significant Accounting Policies

Investments are reported at fair market value, with the exception of short-term investments, which are reported at cost. Purchases and sales of investments are recorded on a trade date basis in accordance with generally accepted accounting principles.

Permanent fund revenues and expenditures are accounted for using the full accrual basis of accounting. Accordingly, revenues are recorded when earned and expenditures are recorded when incurred.

Capital gains and losses from the sale of investments are considered corpus. Accordingly, capital gains are reinvested as part of the principal of the portfolio. However, capital losses are deferred and amortized against future income distributions to beneficiary funds. This process is necessary to meet legal requirements that preclude capital losses from eroding the corpus of the invested funds. In addition, the loss is allocated over the weighted average life of the portfolio in order to alleviate any adverse impact on the current programs supported by these distributions.

Interest earnings, amortization of premiums and discounts, and amortization of deferred capital losses are distributed to beneficiary funds on a monthly basis.

The WSIB reports collateral received under securities lending agreements where the state has the ability to spend, pledge, or sell the collateral without borrower default. Liabilities resulting from these transactions, including broker commissions paid, are also reported. Additionally, costs associated with securities lending transactions are reported as investment management expenses in the accompanying statements. The Schedule of Investments and Statement of Investments do not include detailed holdings of securities lending collateral by investment classification.
