This is Part 2 of the SIB Twenty-Second Annual Investment Report. This booklet does not include information on self-directed defined contribution investments or State Deferred Compensation Plan assets. Summary information regarding the investment of assets in those programs is provided in Part 1 of the Annual Report. The Department of Retirement Systems is responsible for accounting and reporting on investments for those programs.

Retirement Funds

Notes to Financial Statements
June 30, 2003

Note 1: Significant Accounting Policies

Retirement fund investments are reported at fair market value, with the exception of short-term investments, which are reported at cost, and commercial real estate mortgages, which are reported at unpaid principal, adjusted for estimated uncollectibles.

Interest and dividend income is accrued when earned. Capital gains and losses are recognized on a trade date basis. Purchases and sales of investments are also recorded on a trade date basis.

Monthly, the assets of the retirement Commingled Trust Fund (CTF) are adjusted to fair market value. Unrealized gains and losses are included as investment earnings on the Statement of Changes in Investment Balance.

The Washington State Investment Board (WSIB) reports collateral received under securities lending agreements where the state has the ability to spend, pledge, or sell the collateral without borrower default. Liabilities resulting from these transactions are also reported. Additionally, costs associated with securities lending transactions and broker commissions paid, are reported in the accompanying statements. The Schedule of Investments and Statement of Investments do not include detailed holdings of securities lending collateral by investment classification.

Note 2: The Commingled Trust Fund

The CTF is a diversified pool of investments which is used as an investment vehicle for nine separate retirement plans. These plans hold “units” in CTF, which represent a percentage ownership in the pool of investments. Plans are allowed to purchase or sell units in the CTF, based on the market value of the underlying assets, on the first business day of each month.

In addition to unit ownership in the CTF, each retirement plan holds its own short-term investments. These short-term investments are referred to as “plan-specific investments” in the accompanying financial statements and are used to manage the cash needs of the retirement plans.

The Commingled Trust Fund consists of the School Employees’ Retirement System (SERS) Plans 2/3; the Teachers’ Retirement System (TRS) Plans 1 and 2/3; the Public Employees’ Retirement System (PERS) Plans 1 and 2/3; the Law Enforcement Officers’ and Fire Fighters’ Plans 1 and 2; the Washington State Patrol Retirement System; and, the Volunteer Fire Fighters’ Retirement Plan. The Commingled Trust Fund includes only the defined benefit portion of PERS Plan 3, SERS Plan 3, and TRS Plan 3, which are hybrid defined benefit/defined contribution plans.

Note 3: Fees and Expenses

Investment related fees and expenses are paid from non-appropriated funds or are netted directly from the asset value of the invested funds. The Schedule of Investment Expenses is a listing of non-appropriated fees and expenses paid during the fiscal year ending June 30, 2003.

Note 4: Unfunded Commitments

The WSIB has entered into a number of agreements that commit the state, upon request, to make additional investment purchases up to a stated amount. As of June 30, 2003, the state had the following unfunded investment commitments:

Private Equity	\$	5,178,999,138
Real Estate	\$	888,551,588

Note 5: Teachers' Retirement System Plan 3, School Employees' Retirement System Plan 3, and Public Employees' Retirement System Plan 3

The financial information presented in this section includes the WSIB Total Allocation Portfolio (TAP) for PERS Plan 3, TRS Plan 3, and SERS Plan 3, which are invested in the Commingled Trust Fund. It does not include PERS Plan 3, TRS Plan 3, or SERS Plan 3 self-directed investments, which are accounted for and reported on by the Department of Retirement Systems (DRS).

Note 6: Derivatives

At June 30, 2003, the only derivative securities held directly by the WSIB were collateralized mortgage obligations of \$1.6 billion; however, derivatives may include a portion of the WSIB's individual investment managers portfolios.

Note 7: Accruals

The term "Net Accruals" means the sum of accrued income, pending trades receivable and pending trades payable.

Washington State Investment Board

Industrial Insurance Funds

Notes to Financial Statements
June 30, 2003

Note 1: Significant Accounting Policies

Industrial Insurance (Labor & Industries) funds are enterprise funds for financial reporting purposes. Enterprise funds use the full accrual basis of accounting where revenues are recorded in the period earned and expenditures in the period incurred.

Investments are reported at fair market value, with the exception of short-term investments, which are reported at cost.

Interest and dividend income is accrued when earned. Capital gains and losses are recognized on a trade date basis. Purchases and sales of investments are also recorded on a trade date basis.

Unrealized gains and losses are included as investment earnings on the Statement of Changes in Investment Balance.

The WSIB reports collateral received under securities lending agreements where the state has the ability to spend, pledge or sell the collateral without borrower default. Liabilities resulting from these transactions are also reported. Additionally, costs associated with securities lending transactions, including broker commissions paid, are reported as investment management expenses in the accompanying statements. The Schedule of Investments and Statement of Investments do not include detailed holdings of securities lending collateral by investment classification.

Permanent Funds

Notes to Financial Statements
June 30, 2003

Note 1: Significant Accounting Policies

Investments are reported at fair market value, with the exception of short-term investments, which are reported at cost. Purchases and sales of investments are recorded on a trade date basis in accordance with generally accepted accounting principles.

Permanent fund revenues and expenditures are accounted for using the full accrual basis of accounting. Accordingly, revenues are recorded when earned and expenditures are recorded when incurred.

Capital losses are deferred and amortized against future income distributions to beneficiary funds. This process is necessary to meet legal requirements that preclude capital losses from eroding the corpus of the invested funds. In addition, the loss is allocated over the weighted average life of the portfolio in order to alleviate any adverse impact on the current programs supported by these distributions.

Interest earnings, amortization of premiums and discounts, and amortization of deferred capital losses are distributed to beneficiary funds on a monthly basis, capital gains on an annual basis.

The WSIB reports collateral received under securities lending agreements where the state has the ability to spend, pledge, or sell the collateral without borrower default. Liabilities resulting from these transactions, including broker commissions paid, are also reported. Additionally, costs associated with securities lending transactions are reported as investment management expenses in the accompanying statements. The Schedule of Investments and Statement of Investments do not include detailed holdings of securities lending collateral by investment classification.
